Art Unit: 1644

## **DETAILED ACTION**

- 1. Applicant's amendment and response filed 8/11/03 is acknowledged and has been entered.
- 2. Applicant's reply to the restriction requirement in the response filed 8/11/03 is non-responsive because Applicant failed to elect a specific preservative at a specific concentration and a specific buffer at a specific concentration as enunciated below in the office action mailed 6/2/03.
- 3. However, in light of Applicant's cancellation of claims 1-23 in the amendment filed 8/11/03, and the addition of claims 24-44, the following restriction requirement is set forth.
- 4. Restriction to one of the following inventions is required under 35 U.S.C. § 121:
- I. Claims 24-43, drawn to a method of treating a B cell lymphoma in a mammal using an antibody/fragment thereof that binds CD20, classified in Class 424, subclass 143.1.
- II. Claim 44, drawn to a method of treating hemorrhagic shock in a mammal using an antibody that binds CD18, classified in Class 424, subclass 130.1.
- 5. Inventions I and II are different methods of use.

These inventions require different ingredients and process steps to accomplish the use of either treating a B cell lymphoma in a mammal using an antibody that binds CD20 or treating hemorrhagic shock in a mammal using an antibody that binds CD18. These two antibodies have different specificities and the conditions being treated are different conditions.

Therefore they are patentably distinct.

6. Regardless of which invention the Applicant elects, Applicant is further required to (1) elect a single disclosed species of components of the stable aqueous pharmaceutical formulation used in the claimed method, comprising the antibody at a specific concentration range, a specific nonreducing sugar, a specific surfactant at a specific concentration range, a specific preservative at a specific concentration range, a specific buffer at a specific concentration range (for example, the antibody/specific fragment thereof such as F(ab')2 at about 0.1 to about 50 mg/ml, trehalose nonreducing sugar, polysorbate surfactant at about 0.01 to about 0.03%, benzyl alcohol preservative at about 0.5% to 1%, histidine buffer at about 5-30 mM) to which claims would be restricted if no generic claim is finally held to be allowable and (2) to list all claims readable thereon including those subsequently added.

These species are distinct because their structures are different.

Art Unit: 1644

7. Applicant is required under 35 U.S.C. § 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

- 8. Applicant is advised that a response to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.
- 9. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 C.F.R. § 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. M.P.E.P. § 809.02(a).
- 10. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. § 103 of the other invention.
- 11. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.
- 12. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).

Art Unit: 1644

13. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Marianne DiBrino whose telephone number is 703-308-0061. The examiner can normally be reached on Monday and Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Christina Chan, can be reached on (703) 308-3973. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0196.
